### PROFILE

I'm a curious, committed, persevering and comprehensible person that is always looking for the understanding of things, the learning, the teaching, and being able to help other people as long as it is possible.

### EXPERIENCE

#### Linux project with LightDM, Web-Greeter - 2021-Present

Customization, fixing and development of an abandoned project made by Antergos team, that allows to be executed on Ubuntu 20.04 and earlier. Then, most of the code was rewritten to be optimized and to add better functionality with Qt5 for Python3, C additions and web technologies.

#### Linux project with LightDM, Nody-Greeter - 2021-Present

Develop from scratch of a new project with the main purpose of improve the user experience, optimization and functionality of the last program, with technologies like Electron.js and Node-GTK, plus C++ additions and web technologies.

#### Project manager of an ASP.NET web app, InfoLabs - 2022-Present

Management and develop of an ASP.NET Web Forms application that aims to help with the PC management in the laboratories at the Universidad Centroamericana (UCA). Although with a lot of handicaps and difficulties, I was able to lead the team to a clear development path and lay the foundation for the entire platform.

### TOOLS

Head to my portfolio (<https://portfolio-jezerm.vercel.app/>) to see my projects and the tools I've used to make them. Although, here's a summary:

#### Languages

- › C/C++ and C#
- › Java and Kotlin
- › Typescript and Javascript
- › Rust

#### Web Frameworks

- › Vue and Nuxt
- › Svelte/SvelteKit
- › React and Next

#### Databases

- › SQL Server
- › MySQL

### EDUCATION

#### Universidad Centroamericana (UCA); Managua, Nicaragua. – 2021-Presente

Studying the second year of Information Systems Engineering.

#### San Francisco Xavier School, Fe y Alegría; Ciudad Sandino, Managua, Nicaragua. – 2016-2020

Bachelor of Science and Letters.
